

CORONAVIRUS

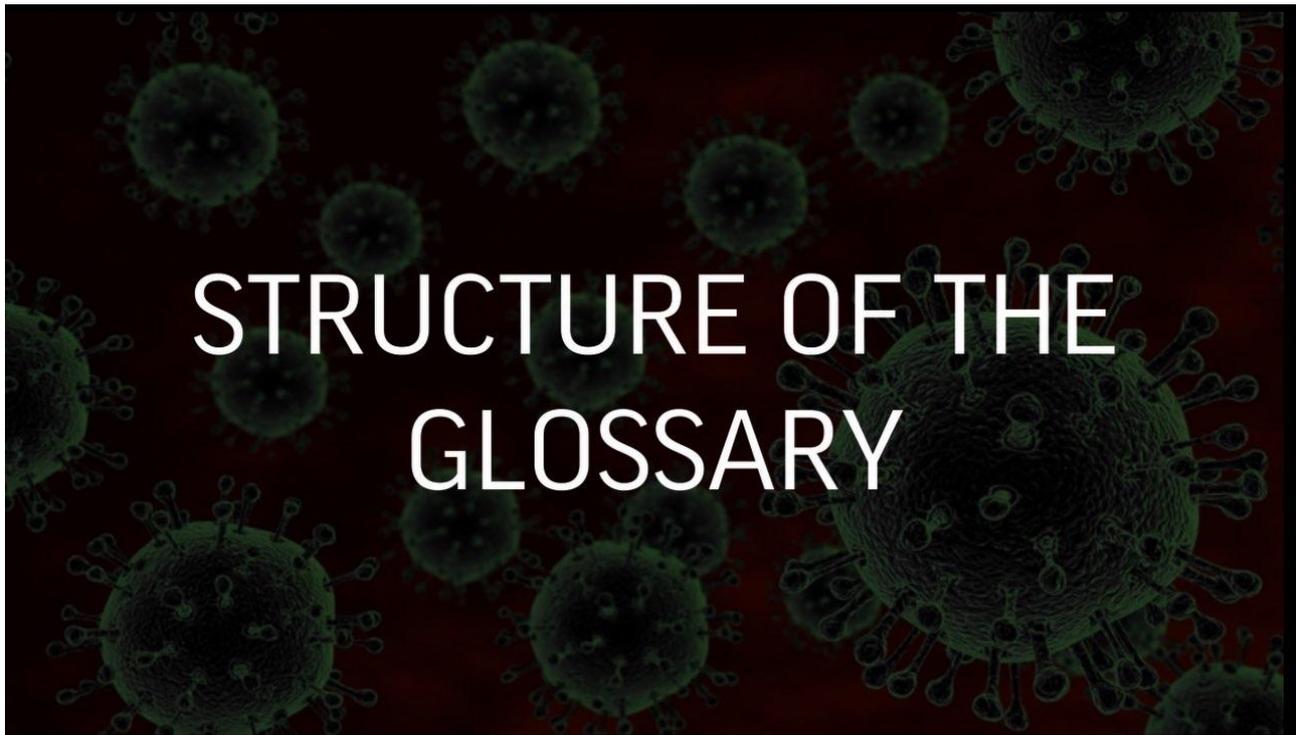

Glossary 2020

University of Social Sciences

Faculty of Humanities in Warsaw

English Philology

Year 2, semester 4, LS Group

THE GLOSSARY OF TERMS IS RELATED TO “COVID-19” IS STRUCTURED AS FOLLOWS:

Column 1
English word
from articles
about
CORONAVIRUS

Column 2: Definitions. Terms
were taken from:
<https://dictionary.cambridge.org/>
and
<https://www.thesaurus.com/>

Column 3:
Example
sentences

Column 4: Word
in
Polish

Column 5: Word
in
Ukrainian

All definitions were taken
exclusively in the meaning
suitable for COVID-19

1.	2.	3.	4.	5.
----	----	----	----	----

English	Definition	Example sentences	Polish word	Ukrainian word
antibiotic	a medicine or chemical that can destroy harmful bacteria in the body or limits their growth	“Furthermore, a combination with the antibiotic azithromycin resulted in a synergistic effect.”	antybiotyk	антибіотик
antiseptic	a chemical used for preventing infection in an injury, especially by killing bacteria	“Antiseptics work by disrupting the fats in pathogen cells, but SARS-CoV-2 does not contain many fats.”	środek antyseptyczny, odkażający	антисептик
asymptomatic	showing no symptoms of a disease	“The Indian Council of Medical Research (ICMR) on Monday said that 80% of the Covid-19 cases remain asymptomatic, which means that a very few are aware that they are infected and symptoms do not give away much.”	bezobjawowy	безсимптомний

autopsy	an examination of a dead body in order to discover the cause of death	“Autopsy reports from Santa Clara County in California have adjusted estimates of the first US fatality from COVID-19 by several weeks.”	autopsja	розтин, аутопсія
breathing difficulty	discomfort when breathing and feeling as if someone cannot draw a complete breath	“These symptoms may appear 2-14 days after exposure to the virus: fever, cough, shortness of breath or difficulty breathing, chills.”	trudności z oddychaniem	порушення дихання
carrier	someone who does not suffer from a disease but has the infection or genetic fault that causes it and can give the disease to someone else	“People who are asymptomatic can still be carriers.”	nosiciel	носії
chloroquine	a medication primarily used to prevent and treat malaria	“Chloroquine is a drug used to treat malaria. It is being explored and tested as a possible treatment for	chlorochina	хлорохін

		the novel coronavirus .”		
contagion	when a disease is spread by touching someone or something	“ Contagion of Covid-19 from a person who died of the disease is minimal.”	zarażenie	зараження
contagious	moving easily from one person to another	“COVID-19 - the contagious respiratory illness caused by a novel (new) coronavirus - continues to spread worldwide.”	zakaźny	заразний, інфекційний
coronavirus	a type of virus that causes diseases in humans and animals. In humans, it usually causes respiratory infections	“Coronavirus disease (COVID-19) is an infectious disease caused by a newly discovered coronavirus.”	koronawirus	коронавірус
cordon sanitaire	a guarded area around a place or country that prevents people from entering or leaving it	“Vertical lines and boxes indicate key dates such as implementation of the cordon sanitaire of Wuhan (grey) and the end of the first incubation period after the	kordon sanitarny	санітарний кордон

		travel restrictions (red).”		
death rate	the number of people who die in a particular group or area over a particular period of time	“The information we’re seeing about the death rate from the coronavirus.”	wskaźnik śmiertelności	показник смертності
disease	(an) illness of people, animals, plants, etc., caused by infection or a failure in health rather than by an accident	“COVID-19 (coronavirus disease 2019) is an infectious disease caused by severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2)”	choroba	хвороба, захворювання
disinfectant	a substance that contains chemicals that kill bacteria and viruses	“The US Environmental Protection Agency released a five-page list of disinfectants.”	środek dezynfekujący	дезинфікуючий засіб
drive-thru testing	a place where you can be tested without getting out of your car	“Health care facilities are now running drive-thru COVID-19 testing sites to enable testing of people with symptoms while reducing	badania dla zmotoryzowanych	тестування водіїв

		potential exposure for others.”		
droplet transmission	the act of transmitting droplets on people around you	“Droplet transmission occurs when a person is in in close contact (within 1 m) with someone who has respiratory symptoms (e.g., coughing or sneezing) and is therefore at risk of having his/her mucosae (mouth and nose) or conjunctiva (eyes) exposed to potentially infective respiratory droplets.”	przekazywanie / transmisja drogą kropelkową	передача повітряно-кравпельним шляхом
drugstore	a store where you can buy medicines	“If your local drugstore can now become a collection site, people can go to their local drugstore.”	apteka	аптека

economic crisis	situation in which some financial assets suddenly lose a large part of their nominal value	“States must weigh that risk against trying to recover from the economic crisis that's been caused by coronavirus-related shut downs”	kryzys ekonomiczny	економічна криза
elective surgeries	procedures that are considered non-urgent and non-essential	“CDC is recommending postponing elective procedures, surgeries, and non-urgent outpatient visits.”	operacje planowe	заплановані операції
epidemic	the appearance of a disease in a large number of people at the same time	“WHO says US faces 'difficult situation' as the coronavirus epidemic.”	epidemia	епідемія
epidemiologist	someone who studies diseases and how they are found spread, and controlled in groups of people	“Lately I've spent a lot of time talking to reporters about what an epidemiologist does, how public health investigations work”	epidemiolog	епідеміолог

exponential	when a disease, such as COVID-19, spreads exponentially, that generally means the number of cases of infection increase steadily but rapidly.	“Without containment, such exponential spread results in a large number of infections even when an area has a small number of cases to begin with”	gwałtownie rosnący	швидкозростаючий
extensive testing	testing someone or something thoroughly	“The main increase on April 27 continues to be for Work Permit holders residing in dormitories, where many more cases are picked up because of extensive testing, MOH said.”	dokładne/ intensywne testowanie	ретельне / інтенсивне тестування
fatality	a death caused by an accident or by violence, or someone who has died in either of these ways	„Ireland's case fatality rate from coronavirus, also known as Covid-19, has risen to 5.3 per cent.“	śmiertelność	смертність

fever	medical condition in which the body temperature is higher than usual and the heart beats very fast	“Common symptoms include: fever, tiredness, dry cough”	gorączka	лихоманка
first responder	someone who is the first to arrive to deal with an emergency, especially a paramedic, police officer, or firefighter	“The same goes for those in nursing homes and other group settings, healthcare workers, first responder, and other essential workers”	pierwsza osoba na miejscu wypadku	перший на місці події
flatten the curve	slowing the spread of an epidemic disease so that the capacity of the healthcare system doesn't become overwhelmed	“Countries around the world are working to “flatten the curve” of the coronavirus pandemic”	spłaszczyć krzywą	вирівняти криву захворюваності
fully recovered	to have no lasting health problems	“In all, 1,095 have fully recovered from the infection and have been discharged from hospitals or community isolation facilities.”	w pełni zdrowy	Одужавший

G - M

English word	Definition	Example sentence	Polish word	Ukrainian word
gathering	a party or a meeting when many people come together as a group	“And we can do more in other areas. For example, at religious gatherings.”	zgromadzenie	згромадженн я
genetic recombination	the process of creating new combinations of genes with characteristics different from those in either parent	“It is the exchange of genetic material between different organisms which leads to production of offspring.”	rekombinacja genetyczna	генетична рекомбінація
germ	a very small organism that causes disease	“If you think you may have COVID-19, reach out to your doctor right away. If you’re going to your doctor’s office or an emergency room, call ahead so someone can meet you outside to give you a facemask to help limit the spread of any germs.”	zarazek	мікроб
hand sanitizer	a liquid-like substance used for cleaning your hands and killing	“FDA tells hand sanitizer producers to make it unpalatable after surge in poison control calls.”	środek do dezynfekcji rąk	Санітайзер для рук

	bacteria on them			
harmful side effects	an unpleasant effect of a drug that happens in addition to the main effect	“That determines whether a drug could have harmful side effects will take time.”	szkodliwe skutki uboczne	шкідливі побічні ефекти
herd immunity	is the immunity or resistance to a particular infection that occurs in a group of people or animals when a very high percentage of individuals have been vaccinated or previously exposed to the infection	“When 70-80% of a given population develops this antibody protection, herd immunity is achieved, indirectly providing protection to those who are not yet immune.”	odporność grupowa	колективний імунітет
host cells	a living cell in which a virus multiplies	“A cell that harbors foreign molecules, viruses, or microorganisms. For example, a cell being host to a virus.”	komórki gospodarza	материнська клітина

hygiene	the degree to which people keep themselves or their environment clean, especially to prevent disease	“This is why hand hygiene is so important.”	higiena	гієна
ICU (Intensive Care Unit)	intensive care unit: the part of a hospital that provides continuous treatment for patients who are seriously ill, very badly injured, or who have just had an operation	“At the makeshift ICU at the Bahrain Defence Force Hospital in Riffa, south of the capital Manama, each bed is equipped with a ventilator.”	oddział intensywnej terapii	відділення інтенсивної терапії
IgG (Immunoglobulin G)	the main antibody a substance in the body that attacks harmful bacteria found in blood and other body fluids	“A single exposure is enough to generate robust, neutralizing IgG antibodies that circulate in the blood throughout life and provide lifelong protection, Crotty notes.”	immunoglobulin a g	імуноглобулін g
Immunity	a situation in which you are protected against disease or	“The study aims to improve understanding of infection levels and how many people may have immunity	odporność	опір, імунітет

	from legal action	to the virus.”		
Immunocompromised	having an impaired immune system	“People with a weakened immune system are sometimes described as being immunocompromised.”	mający obniżoną odporność	занижений імунітет
Immunosuppressive	preventing the immune system from reacting to antigens, for example in order to prevent transplanted organs from being rejected	“Older adults (those 65 years of age or older) and those with immunosuppressive conditions like cancer, or taking immunosuppressive medications, are also at increased risk of severe illness.”	środek immunosupresyjny	імунодепресант
incubation period	the period of time between harmful bacteria or viruses entering a person's or animal's body, or entering a plant, and the effects of a disease appearing	“When they know the incubation period they will know how long to keep people in quarantine.”	okres inkubacji	інкубаційний період
index case	the first identified case in a group of related cases of a	“An index case is “the first documented case of an infectious disease or genetically	pierwszy potwierdzony przypadek	перший підтверджений випадок

	particular communicable or heritable disease	transmitted condition or mutation in a population, region, or family.”		
infected	containing bacteria or other things that can cause disease	“People of all ages can be infected by the novel coronavirus COVID-19.”	zakażony	інфікований
isolation	the condition of being alone, especially when this makes you feel unhappy	“ The virus was isolated from nasopharyngeal and oropharyngeal samples from putative COVID-19 patients. “	izolacja	ізоляція
isopropyl alcohol	a type of alcohol used in industry and in products used at home, for example as a solvent (= substance that dissolves paint, glue, etc.)	“Experts say that disinfectant wipes and spray, and solutions made with 70% isopropyl alcohol are also effective at destroying the virus' structure.”	alkohol izopropylowy	ізопропіловий спирт
laboratory	a room or building equipped for scientific experiments , research, or teaching, or for the manufacture of drugs or	“The purpose of this document is to provide interim guidance to laboratories and stakeholders involved in laboratory testing of COVID-19 virus”	laboratorium	лабораторія

	chemicals.			
makeshift hospital	<p>serving as a temporary or expedient means, esp. during an emergency</p>	<p>“The last of a dozen makeshift hospitals in Wuhan, where the coronavirus outbreak began, officially closed on Tuesday in a sign that authorities' efforts to curb the virus are working.”</p>	<p>szpital tymczasowy, zastępczy</p>	<p>тимчасовий шпиталь</p>
mRNA-1273	<p>mRNA-1273 is a vaccine developed by Moderna that is currently undergoing investigation for the prophylaxis of SARS-CoV-2 infection.</p>	<p>“An experimental vaccine called mRNA-1273, developed by the biotechnology firm Moderna as a candidate to protect against the novel coronavirus, is in early stages of clinical trials with healthy adult participants.”</p>	<p>mRNA-1273</p>	<p>МРНК-1273</p>

N - S

English word	Definition	Example sentence	Polish word	Ukrainian word
nasopharyngeal swab	<p>a method for collecting a clinical test sample of nasal secretions from the back of the nose and throat. The sample is then</p>	<p>“Diagnosis of Covid-19 is usually based on detection of SARS-CoV-2 by PCR testing of a nasopharyngeal swab or other specimen.”</p>	<p>wymaz z jamy nosowo-gardłowej</p>	<p>НОСОГЛОТКОВИЙ мазок</p>

	analyzed for the presence of organisms or other clinical markers for disease.			
neutralizing antibodies	an antibody that defends a cell from a pathogen or infectious particle by neutralizing any effect it has biologically	“In the short term, an in vitro test that measures neutralizing anti-SARS-CoV-2 antibodies may be sufficient to estimate what levels of antibody titers are protective.”	przeciwciężła neutralizująca	нейтралізуючі антитіла
novel coronavirus	a new coronavirus	“Until they gave it a name, they mostly referred to COVID-19 as novel coronavirus (disease).”	nowy koronawirus	новий коронавірус
N95 mask	a mask that removes 95% of 3+ micron-particles	“Amid a worldwide shortage of N95 respirators that help protect healthcare workers on the frontlines of the COVID-19 pandemic, a new study conducted by federal scientists found that the masks	maska z filtrem	маска с фільтром №95

		can be effectively decontaminated from SARS-CoV-2 exposure and reused up to three times.”		
outbreak	a time when something suddenly begins, especially a disease or something else dangerous or unpleasant	“ There was another outbreak of the disease in 1993 but the cause was uncertain. ”	wybuch	спалах
panacea	remedy for all ills and difficulties	“The proposed concept of an “ethical precautionary principle” is not a panacea.”	panaceum	панацея
pandemic	(of a disease) existing in almost all of an area or in almost all of a group of people, animals, or plants	“COVID-19 is the infectious disease caused by the most recently discovered coronavirus. This new virus and disease were unknown before the outbreak began in Wuhan, China, in December 2019. COVID-19 is now a pandemic affecting many countries	pandemia	пандемія

		globally.”		
pathogen	any small organism, such as a virus or a bacterium that can cause disease	“Fortunately, most pathogens are dealt with by the body's immune system.”	patogen	патоген
patient zero	a person identified as the first to become infected with an illness or disease in an outbreak	“Authoritites usually try to determine who patient zero was in any given outbreak as can help answer important questions about how, when and why it started.”	pacjent zero	нульовий пацієнт
PCR test	an innovatice method of testing	“The PCR test is one of the tools that doctors use to diagnose certain coronavirus diseases.”	badania PCR	ПЛР-тести
personal protective equipment (PPE)	protective clothing, helmets, goggles, or other garments or equipment designed to protect the wearer's body from injury or infection	“Much of the PPE worn by doctors and nurses has to be worn once only and destroyed after use.”	indywidualne wyposazenie ochronne	засоби індивідуального захисту
protective measures	include risk reduction by inherently safe	“Due to the outbreak of the coronavirus	środki ochronne	захисні заходи

	design, protective devices, personal protective equipment, information for use and installation, and training	(COVID-19) we would like to remind everybody to take protective measures against the virus.”		
quarantine	a period of time during which an animal or person that might have a disease is kept away from other people or animals so that the disease cannot spread	“It is intended for those responsible for establishing local or national policy for quarantine of individuals, and adherence to infection prevention and control measures.”	kwarantanna	карантин
remote working	a working style that allows professionals to work outside of a traditional office environment.	“Other companies and products that facilitate remote working, such as the video-conferencing service Zoom and the chat app Slack, have also enjoyed significant spikes since the virus began to spread.”	praca zdalna	віддалена робота
respirator	an apparatus worn over the mouth and nose or the entire face to	“A respirator is a masklike device, usually of gauze, worn over the mouth	respirator	протигаз

	prevent the inhalation of dust, smoke, or other noxious substances.	(or nose and mouth) to prevent the inhalation of noxious substances or the like.”		
respiratory distress / respiratory failure	Respiratory distress can result from disorders in the respiratory system or in organ systems that control or influence respiration.	“Recognize severe cases, when severe respiratory distress may not be sufficiently treated by oxygen alone, even when administered at high flow rates.”	niewydolność oddechowa	дихальна недостатність
sample	a small part or quantity intended to show what the whole is like.	“A World Health Organization (WHO) driver has been killed in a conflict-riven region of Myanmar while out collecting Covid-19 monitoring samples.”	próbka	зразок
SARS-CoV-2	the virus strain that causes coronavirus disease (COVID-19), a respiratory illness	“SARS-CoV-2 is the name of the virus and COVID-19 is the name of the disease.”	SARS-CoV-2	SARS-CoV-2
screening	the evaluation or investigation of something as part of a methodical survey, to assess suitability for a particular role or purpose.	“For COVID-19 the first step in screening is usually taking a person’s temperature - They now conduct screening for all	badanie przesiewowe, przesiew	скринінг

		incoming passengers.”		
social distancing	interventions or measures taken to prevent the spread of a contagious disease by maintaining a physical distance between people and reducing the number of times people come into close contact with each other.	“The government has instructed schools to take social distancing measures to slow the spread of the virus.”	utrzymywanie dystansu od innych ludzi	соціальне дистанціювання
spread	to (cause to) cover, reach, or have an effect on a wider or increasing area	“With this many new positive cases, the evidence suggests that we now have community spread right here in our county.”	rozprzestrzeniać się	поширити
standard precautions	a set of infection control practices used to prevent transmission of diseases that can be acquired by contact with blood, body fluids, non-	“Apply routinely in all health-care settings for all patients. Standard precautions include: hand hygiene and use of personal protective equipment	podstawowe środki ostrożności	основні запобіжні заходи

	intact skin (including rashes), and mucous membranes	(PPE) to avoid direct contact with patients' blood, body fluids, secretions (including respiratory secretions) and non-intact skin."		
STAT	a common medical abbreviation for urgent or rush. From the Latin word statum, meaning 'immediately.	"Alan Wells, a pathologist at the University of Pittsburgh Medical Center, tells STAT that his facility is not using the test anymore because the viral load of the patient might play a role with testing accuracy, more readily identifying those with higher levels."	na cito	ШВИДКО
stock up	to buy a large quantity of something	"You also probably do not need to stock up on face masks, as health professionals and people who are already sick should be the only ones wearing them,	robić zapasy	запастися

		says Dr. Jonathan Fielding, (...)"		
superspreader	contagious organism infected with a disease	"One so-called "superspreader" in South Korea infected at least 37 people at her church with the virus."	osoba zakażona przenosząca infekcję na innych	інфікована людина, що передає інфекцію іншим
symptomatic	showing symptoms of a particular disease	"Anyone who is symptomatic is advised to phone a doctor and get tested."	objawowy, symptomatyczny	СИМПТОМАТИЧНИЙ
symptoms	any feeling of illness or physical or mental change that is caused by a particular disease	"Typical symptoms of COVID-19 are fever, coughing, and shortness of breath."	symptomy, objawy	СИМПТОМИ

T - Z

English word	Definition	Example sentence	Polish word	Ukrainian word
temperature	the degree or intensity of heat present in a substance or object, especially as expressed according to a comparative scale and	"However, higher temperatures affect other environmental factors such as humidity, or rather relative humidity."	temperatura	температура

	shown by a thermometer or perceived by touch.			
test	a procedure intended to establish the quality, performance, or reliability of something, especially before it is taken into widespread use.	“Lastly, there’s a new test that’s starting to be offered: serology.”	test, badanie (np. badanie krwi)	тест
testing kit	a test kit is a commercially packaged system of the principal or key components of an analytical method used to determine the presence of a specific analyte(s) in a given matrix (es).	“Australian stocks of coronavirus testing kits 'rapidly deteriorating', says chief medical officer.”	zestaw do badań	набір для тестування
threshold	a level, rate, or amount at which something comes into effect	“The BMA says managers and senior doctors will set "thresholds" for admission to intensive care units - the places where the most sick will need treating with	próg	епідеміологічний поріг

		ventilators.“		
throat swab culture	a throat swab culture is a laboratory test that is done to identify germs that may cause infection in the throat. It is most often used to diagnose strep throat.	“The COVID-19 PCR Swab test kit requires a throat swab sample to be collected and sent back to our accredited UK laboratory for testing.”	próbka wymazu z gardła	мазок з горла
transmission	in medicine, public health, and biology, transmission is the passing of a pathogen causing communicable disease from an infected host individual or group to a particular individual or group, regardless of whether the other individual was previously infected.	“There's one other route that's thought to play a role in the spread of COVID-19: contact transmission.”	oddawanie/ przekazywanie (np.krwi)	спосіб передачі
treat	to behave towards someone or deal with something in a particular way	“Doctors cannot currently treat COVID-19 directly and instead concentrate on relieving	leczyć	лікувати

		symptoms.”		
treatment	medical care given to a patient for an illness or injury.	“Treatment is directed at relieving symptoms and may include: pain relievers (ibuprofen or acetaminophen), cough syrup or medication, rest, fluid intake.”	leczenie	лікування
triage	an assignment of degrees of urgency to wounds or illnesses to decide the order of treatment of a large number of patients or casualties.	“Triage is the process of determining the priority of patients' treatments based on the severity of their condition or likelihood of recovery with and without treatment.”	ocena stanu zdrowia	сортування
toroviruses	is a genus of viruses in the family Tobaniviridae, in the subfamily Torovirinae. They primarily infect vertebrates	“Coronaviruses and toroviruses are two virus genera within the virus family Coronaviridae, order Nidovirales.”	torowirusy	торовіруси
tourism	the commercial organization and operation of holidays and visits to places	“Tourism is within the 'public-facing' parts of the private sector	turystyka	туризм

	of interest	economy, which are most at risk from sustained constraints on social contact.”		
unemployment	the state of being out of job	“COVID-19 has created an unprecedented demand for our services—especially unemployment insurance and Paid Family and Medical Leave.”	bezrobocie	безробіття
upper respiratory tract	it is the part of the anatomy of the respiratory system involved with the process of respiration.	“Until 2003, coronaviruses attracted little interest beyond causing mild upper respiratory tract infections.”	górne drogi oddechowe	верхні дихальні шляхи
vaccine	a substance used to stimulate the production of antibodies and provide immunity against one or several diseases, prepared from the causative agent of a disease, its products, or a synthetic substitute, treated to act	“As scientists and researchers race toward a vaccine, governments are attempting to mitigate the economic damage.”	szczepionka	вакцина

	as an antigen without inducing the disease.			
VHP	it is a vapor form of hydrogen peroxide (H ₂ O ₂) with applications as a low-temperature antimicrobial vapor used to decontaminate enclosed and sealed areas such as laboratory workstations, isolation and pass-through rooms, and even aircraft interiors.	“The investigators tested different decontamination methods on small sections of filter fabric from N95 respirators that had been exposed to the SARS-CoV-2 virus, including vaporized hydrogen peroxide (VHP), 70 °C dry heat, ultraviolet light, and 70 percent ethanol spray, according to a press release.”	para wodna nadtlenu wodoru (H ₂ O ₂)	пероксид водню
viral load	it is the amount of a virus in a sample, especially a person’s blood or other bodily fluids.	“it is also possible that individuals with pneumonia who have a higher viral load might develop more serious disease, but disease development is complex and no doubt many factors will have an impact.”	ilość wirusa w próbce	вірусне навантаження
virus	an infective agent that	“The official virus name is	wirus	вірус

	typically consists of a nucleic acid molecule in a protein coat, is too small to be seen by light microscopy, and is able to multiply only within the living cells of a host.	similar to SARS-CoV, the virus strain that caused epidemic severe acute respiratory syndrome (SARS) in 2002-2004, potentially causing confusion.”		
vitamin	any of a group of organic compounds that are essential for normal growth and nutrition and are required in small quantities in the diet because they cannot be synthesized by the body.	“Dietary supplements containing micronutrients and vitamins C and D are a safe, low-cost, and effective way of helping the immune system fight off COVID-19 other acute respiratory tract diseases according to a new report.”	witamina	ВІТАМІН
widespread	found or distributed over a large area or number of people.	“There is widespread, ongoing transmission of novel coronavirus worldwide (see Global COVID-19 Pandemic Notice).”	powszechny, o szerokim zasięgu	широко розповсюджений
World Health Organization	it is a specialized agency of the	“WHO will continue to provide updated	Światowa Organizacja Zdrowia	Всесвітня

	United Nations responsible for international public health.	information as soon as clinical findings become available.”		організація охорони здоров'я
worst-hit	most severely affected.	“The four worst-hit countries in Europe are Italy, the UK, Spain and France - all of which have recorded at least 20,000 deaths.”	najbardziej dotknięty	найбільш постраждалий
Wuhan	the capital city of Hubei province in the People's Republic of China	“The first cases were seen in Wuhan, China, in late December 2019 before spreading globally.”	Wuhan	Ухань
zoonotic	a disease that can be transmitted from animals to people or, more specifically, a disease that normally exists in animals but that can infect humans.	“It is estimated that, globally, about one billion cases of illness and millions of death occur every year from zoonoses.”	zoonotyczny	ЗООНОТИЧНИЙ
